

## X-ray and Clinical Examination

**Executed for:**  
 Vervloesem Els

**Address:**

Executed on:	23/05/2025
Name:	Edgar SPB
Chip Number:	981100006087665
UELN Number:	056002P00712788
Origin:	Skywalker van het Klavertje x Levisto Z
Sex:	M
Birthdate:	14/04/2023
Colour:	grey

### Clinical Examination:

Conformation and stand:	normal
Nutritional Status:	normal
Skin and coat:	normal
Mucous membranes:	normal
Lymph Nodes:	normal
Eyes:	normal
Mouth:	normal
Current height:	148cm
<u>Cardiovascular System</u>	
Heart rate at rest:	normal
Heart rate after exercise:	normal
Jugular vene:	normal
<u>Respiratory System</u>	
Respiration at rest:	normal
Respiration after exercise:	normal
Spontaneous coughing:	normal
Larynx sensitivity:	normal
Type of respiration:	normal
<u>Digestive System:</u>	normal
<u>Urogenital System:</u>	normal - 2 testes present
<u>Nervous System:</u>	normal
<u>Inspection and Palpation</u>	
Head:	normal
Neck:	normal
Withers:	normal
Back:	normal
Croup:	normal
Left front limb:	normal
Right front limb:	normal
Left hind limb:	normal
Right hind limb:	normal
Fore and Hind Hooves	
Horn quality:	normal
Hoof percussion:	normal
Size and shape:	normal
Fore and Hind Shoeing:	normal - no shoeing
Scars:	no scars present

This report is only valid if provided with a signature and general terms and conditions.

**Gait:**

Walking on hard surface

Straight line:	normal
Small circle left:	normal
Small circle right:	normal

Trotting on hard surface

Straight line:	normal
Small circle left:	normal
Small circle right:	normal

Trotting on soft surface

Small circle left:	normal
Small circle right:	normal

Cantering on soft surface

Small circle left:	normal
Small circle right:	normal
Walking backwards:	normal

**X-Ray Examination: report based on X-rays made by colleague vet Lukas Plancke**

Navicular DP RF:	No significant abnormalities 1
Navicular DP LF:	No significant abnormalities 1
Navicular LM RF:	No significant abnormalities 1
Navicular LM LF:	No significant abnormalities 1
Fetlock LM RF:	very small fragment dorsal P1 2
Fetlock LM LF:	No significant abnormalities 1
Fetlock LM RH:	No significant abnormalities - mineralisation plantaroproximal aspect sesamoid sheath 1-2
Fetlock LM LH:	No significant abnormalities - small OC ridge 1-2
Tarsus LM + APLO RH:	No significant abnormalities 1
Tarsus LM + APLO LH:	No significant abnormalities 1
Tarsus APLO RH:	No significant abnormalities 1
Tarsus APLO LH:	No significant abnormalities 1
Stifle LM RH:	No significant abnormalities 1
Stifle LM LH:	No significant abnormalities 1
Tarsus DP RH:	No significant abnormalities 1
Tarsus DP LH:	No significant abnormalities 1
Stifle DP RH:	No significant abnormalities 1
Stifle DP LH:	No significant abnormalities 1

Other radiological examinations: no.

Other findings and remarks: no

During the examination there were no indications of vices.

**Overview Conclusion**

**Conclusion Clinical Examination**

- No abnormal findings
- Abnormal findings (see examination protocol)
- Not performed

**Conclusion of the X-Ray Examination**

- Good
- Satisfactory
- Moderate
- Unsatisfactory
- Not performed
- 
- Acceptable
- Increased Risk
- Not Acceptable

**Final Conclusion:**

The horse receives a normal medical risk.

Kind regards,

This report is only valid if provided with a signature and general terms and conditions.

#### Terms and conditions

*A prepurchase or sale examination gives only my personal assessment of the current medical condition of the horse. Linked is a type of risk assessment of medical problems that can happen regarding the use of the horse.*

This examination has several limitations:

- Each exam is a snapshot. Any horse can at one moment seem very healthy, or at another limping, showing heart murmurs or respiratory distress. This difference may be due to coincidence, occurred after injury or illness, changes in housing, whether or even drug camouflage prior to the exam.
- If the customer wants it, there is the possibility to include a blood sampling to detect illegal substances.
- It deals no obligation towards any results. The horse is examined in function of a client and the purpose for which the horse will be used. This exam and the standards used for it, can therefore vary between clients and horses. This report is therefore only applicable to no one else than the person stated on the report.
- The client agrees with the extent of the investigation, and realizes that this is always a compromise between risk-limitation and price for the exam. If for example an additional endoscopy or additional X-rays are desirable, this can be asked in advance or during the exam.
- The standards used in the radiographic examination can be different from those used by colleagues or universities and can differ between what is common in different countries. There are only those findings indicated that I believe are important. Deviations that I believe have no interest are not mentioned. Example: fragments at the distal border of the navicular bone (with or without a recess in the navicular bone itself), ossification of the hoof cartilage, etc.
- Since this exam is no research addressing the capabilities of the horse as a riding or sporthorse... Neither is it a valuation of the horse.
- It cannot clearly demonstrate whether the horse might have had surgery or other treatments, such as repeated infiltration of the joints, colic surgery, ... Hence it is the sole responsibility of the purchaser to cover himself here.
- It is also the sole responsibility of the purchaser to cover himself in terms of stable vices such as: crib biting, wind sucking, weaving ...
- The buyer must be aware that some diseases are seasonal, so they may not be present at the time of the inspection. (for example summer itch, headshaking, ...)
- About this aspect he must cover himself as well.
- If the buyer wants to insure the horse, he will have to wait before buying it, until he has the approval of the insurance company. A test conducted by myself, is not automatically an approval for an insurance company. They may have different standards.
- This exam gives you no advise as a future stallion, because the standards used for this can be vary between the different studbooks.
- It is also the buyer's full responsibility to receive the full ownership papers included the "mutatie luik" of the horse.

This report is only valid if provided with a signature and general terms and conditions.
